

PRESS RELEASE

FOR IMMEDIATE RELEASE

May 13, 2016

Shinnosuke Taguchi, President & CEO

T Solution Japan Corp.

“T-BLADE™” presented at 25th Japan IT Week Spring

T Solution Japan Corp. (Shinnosuke Taguchi, President & CEO, hereinafter referred to as TSJ) announced today that “**T-BLADE™**” exhibited a booth at 25th Japan IT Week Spring (held at Tokyo Big Sight) sponsored by Reed Exhibitions Japan Ltd., from May 11 to 13, 2016.

Many of the customers visited our booth during the exhibition and left various comments on “**T-BLADE™**,” the world’s first back-typing Bluetooth keyboard.

In addition, with the driving growth of tablets for business use in recent years, TSJ received inquiries from respective companies regarding implementation of “**T-BLADE™**,” being used as an input device in construction, education and medical fields.

Currently, TSJ is under development of “B-to-C model” in preparation for the launch of “**T-BLADE™**” in 2016, but will also be focusing on development of “B-to-B model **T-BLADE™**” that can be utilized in the fields of business and education in the future.

Comments from the visitors were as follows:

[iPad users]

- I was gravitated toward the design and got interested as “What is this?”
- I couldn't come up with a keyboard enabling a user to remain standing. This is cutting edge technology.

[Solution vendors for education]

- We were looking for a device that teachers can type in while standing in extracurricular lessons.
- We were looking for an input device for teachers to take notes on students' opinions during classes.

[Development personnel at a major construction company]

- We would like to consider joint development of this product as an input device for the tablets used at construction sites.

*S-MAX (a blog media) who visited our booth and interviewed TSJ at the exhibition posted an article.
